

Issue	Feedback
1. Lectures cannot be streamed on iPad.	1. CAI are aware of the issue and are attempting to update the software to facilitate this in the future.
2. Past papers should be made available in one location, for example in a zip lock file.	2. This is currently being looked at and it is proposed that a "past papers" tab would be made available within the student centre.
3. Lack of marks being awarded for workings in the DEBK assessment	3. Pass rates do not reflect that this is having an adverse impact on students.
4. The need for students to use figures in preparing a sensitivity analysis in question 1 of the Finance paper.	4. The competency statement advises that sensitivity analysis is examinable at the "apply" level. Students are reminded that even at the basic "understand" level, it is possible that the use of figures may be required.
5. Ambiguous wording in the Management Accounting paper.	5. This information has been brought to the attention of the examiner.
6. Introduction of a continuous assessment for Finance.	6. Logistics currently allow for one assessment to be held. While CAI note the request there are currently no plans to add any additional assessments.
